PHONE MEMORANDUM:

Date – January 25, 2010

To – File

Call From – Mr. Jerry L. Parks (252) 338-4490

Call To – Aaron Shear (1:40m)

Subject – County Manager Letter (Albemarle Regional Health Services)

Phone call received from Jerry Parks, Health Director for the Albemarle Regional Health Services, who is responsible for the following counties: Bertie, Camden, Chowan, Currituck, Gates, Pasquotank, and Perquimans. Jerry has received (directly or forwarded from County Managers) several of the general county notification letters and was calling to confirm his understanding of the letters content. I explained to Jerry about Senate Bill 1492 and the establishment of the Pre-Regulatory Landfill Unit. I then told him that the letters sent to County Manager and Env. Health Directors/Supervisors was a general notification about which the program and about landfills in the various counties that we are currently aware of. I then told him that if he is aware of other landfills that may potentially qualify into the pre-regulatory program, or if he knows of sites where redevelopment activities are planned, he should notify the Unit.

Mr. Randell Woodruff
Camden County Manager
PO Box 190
Camden, NC 27921

Subject: Pre-Regulatory Landfill Site in Camden County

Dear Mr. Woodruff:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the site identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the site listed below tentatively qualifies under Senate Bill 1492.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NONCD0000296	Newby's Trash Service Dump	South Mill Dam Rd, Camden

Work at this site may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, http://wastenotnc.org/sfhome/IHSBRNCH_OldLandfills.HTM, for your review.

An additional purpose in notifying you of this sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the site in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified site, or need further information, please contact me at (919) 508-8484.

Sincerely,

A handwritten signature in black ink, consisting of a large, stylized 'A' followed by a horizontal line extending to the right.

February 26, 2007

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

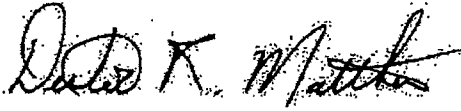

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" and last name "Matthews" clearly distinguishable.

DRAFT
May 6, 1976

Mr. Jack Leary
Clerk
Camden County Board
of Commissioners
Camden, NC 27921

JK
Dear Mr. Leary:

In reply to your request for assistance in obtaining a piece of state property on SR 1207, I would like for you to provide me with the proper documentation that the site has been approved for sanitary land fill operation. I am familiar with the requirements regarding site approval for sanitary landfills and I think it would be advisable that this approval be made prior to my making any effort to negotiate for the property owned by the North Carolina Department of Transportation.

I can assure you that upon receipt of this information that I will make every effort to assist you in acquiring this property.

Very truly yours,

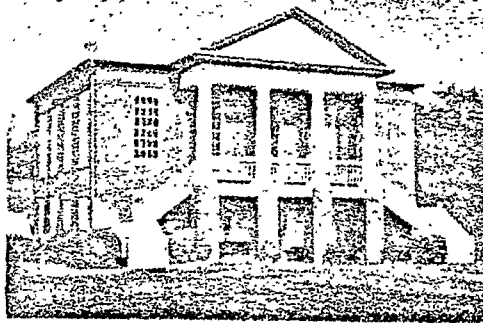

W. Stanford White
Representative

JACK LEARY, Clerk

OFFICE OF THE BOARD OF COMMISSIONERS

Camden, N. C. 27921

February 2, 1976

To The Honorable Senators and Representatives:
First District

Gentlemen:

In the very near future we have got to locate another site for our landfill operations. We have tried to obtain several tracts but to this date we have not been successful. Our most recent negotiations were with Mr. J. O. Sellars, Department of Transportation, concerning a piece of property now owned by the state located on road SR1207.

We hereby respectfully request your assistance in acquiring this tract of land to be used as aforesaid in compliance with the rules and regulations of the State Board of Health.

Sincerely,

The Board of Camden County Commissioners

June 13, 1975

Mr. Calvin Lamb
C & L Concrete Works
P. O. Box 47
Elizabeth City, NC 27909

Dear Mr. Lamb:

The Camden County Solid Waste Disposal Area was inspected on June 11, 1975. My inspection of the site revealed that there is more work that must be done before you lease the site to the County.

JRM
There is still an erosion and leachate problem on the back dike. This area must be filled and graded to approximately a 3:1 slope to prevent erosion and leachate. Some type of vegetation must be established on the slopes of the perimeter dikes to help prevent erosion.

The site was also burning at the time of my inspection. Burning waste must be put out by covering with earth.

There is evidence that the daily accumulation of waste at the site is not being compacted and covered. You were granted permission to operate the site in accordance with the "Rules and Regulations Providing Standards for Solid Waste Disposal." You must continue to do this until the County assumes responsibility for the site.

If I can be of any assistance to you in closing this site, please contact me so we can arrange to meet on the site.

Sincerely,

A handwritten signature in dark ink, appearing to read "BWM".

Mr. T. F. Loery, Chairman
Gaston County Commissioners
Shiloh, N. C. 27974

JH
Dear Mr. Loery:

I would like to thank you for meeting Mr. Morris and me on March 10, 1975. It was a pleasure to talk with you as well as to find you have so much concern in providing Gaston County with an acceptable solid waste disposal program. I feel that our discussion gave you and Mr. Jack Loery a better understanding of what Mr. Morris and I feel are some of the problems facing your County.

This office is willing to discuss any reasonable approach to providing a solid waste disposal site for Gaston County. We do feel that due to the very bad conditions that exist at the site now being used that some decision must be made in the reasonably near future.

Please keep us informed as to the progress being made and if we can be of assistance, please let us know.

Sincerely,

O. W. Strickland, Supervisor

Elizabeth City, N. C. 27909

Dear Mr. Lamb:

In reviewing our records, I find that the solid waste disposal site that you operate in Camden County is not being operated in accordance with the operational requirements of the Division of Health Services "Rules and Regulations Providing Standards for Solid Waste Disposal." The site was inspected four times during 1974 and the latest inspection was on January 23, 1975. On each of the inspections, there were major violations, including burning on the last inspection. *dx*

This office informs you that unless the site is brought into full compliance or properly closed within thirty days from this date, we will have no choice but to turn the records over to the Attorney General's office for appropriate action.

If there are questions or we can be of assistance, please let us know.

Sincerely,

O. W. Strickland, Supervisor

Elizabeth City, N. C. 27909

Dear Mr. Lamb:

I am in receipt of an inspection report made on the Gaston County Landfill by Mr. Bill Morris on February 6, 1974. The authority to operate the above named landfill was issued to you. In reviewing my records I find that Mr. Morris inspected your landfill on August 8, September 9, October 8, and November 8, 1973, and on each of those inspections as well as the inspection on February 6, 1974, the site was not being operated in accordance with the requirements for a sanitary landfill. 

It is requested that the items marked on the inspection sheet be corrected immediately.

The site will be reinspected within thirty days and your approval to operate will depend on the conditions found.

If there are questions or if this office can be of assistance, please let us hear from you.

Yours truly,

Health, Education, and Welfare
Elizabeth City, North Carolina

Dear Sirs:

We have been putting off writing this letter in hopes that the people who are in charge of the welfare of people in Camden County would see the need of correcting the problem.

The problem we are speaking about is the trash dump on State Road 1211 in the vicinity of South Mills in Camden County, North Carolina.

With a family living across the road from the dump and other families who have to pass by daily we feel this situation should be looked into as soon as possible.

It seems it only safe to say this dump breeds germs, rats, and stray dogs which are surviving from the dump. With the condition of the dogs alone, that would be a menace, coming in contact with humans.

There is only one way in and out for the residents of South Mills Shores and cans, bottles, and broken glass from the dump have remained scattered on the road which are a hazard to driving. Water from rains causes trash to wash on the road.

The property owners take pride in having property on the Inland Waterway. With the dump located adjacent to the waterway, it keeps garbage and trash floating down the canal.

We, taxpayers of Camden County, feel something should be done about the deplorable condition.

Sincerely,

Signed:

Gentlemen:

I Calvin Lamb do request permission from you to inspect a 16 acrea sight in Camden County for an approval to operate a land fill on this site, it is mostly cut over woodland, owned by me.

There is no zoning ordnances in Camden County, they have given me their permission to operate a land fill on this site (you will find a letter of their approval enclosed).

In order to stay above water table we can go down only 3 to 4 feet deep, so I purpose to start from there and go about 10 to 12 feet above ground level.

I would like your approval and to know when you could come to inspect it. I estimated this site will last about 5 years for the city of Elizabeth City and Camden, Currituck, and Pasquotank Countys for dumping.

If you need any further information please let me know.
Thank You.

Sincerely yours

Calvin Lamb

Re: Clearinghouse Notification No. 71-0508

The attached Notification to Clearinghouse of Intent to Apply for Assistance is referred to you for review and comment in accordance with Project Notification and Review System procedures established under Bureau of the Budget Circular No. A-95.

RESPONSE REQUESTED BY April 30, 1971

In each response, please refer to the Clearinghouse Notification No. shown above. If your agency does not wish to submit written comments, you may respond by telephone.

It is recommended that you contact the applicant directly if your agency needs additional information on the proposed application, or if there are any questions which may be resolved in this way.
